Press Release

FOR IMMEDIATE RELEASE

Ref: 2021 / 07 / 27 – NP

NP to receive Shipment of New 20lb cylinders

The Trinidad & Tobago National Petroleum Marketing Company Limited (NP) wishes to advise that a shipment containing 7,000 new 20lb Liquefied Petroleum Gas (LPG) cylinders, will become available to customers during the first week in August. Due to unforeseen supply chain issues brought about by the COVID-19 pandemic, the shipment was unexpectedly delayed, which has resulted in new cylinders being temporarily unavailable to *first-time stove owners* and *those wishing to purchase additional cylinders*. Nevertheless, the issue will soon be rectified as the vessel, which has already landed at the Port, is awaiting the completion of the customs clearance.

NP wishes to assure the public that the delay in receiving these new cylinders has in no way affected the supply of LPG cylinders to the larger market, as full LPG cylinders continue to be widely available for purchase across the Service Station network, through the LPG Distributors and at NP's regular distribution points.

Furthermore, we wish to thank the public for their patience in this matter and reassure customers that these new cylinders will complement the more than 1 million, 20lb cylinders already in circulation in the local market.

NP remains committed to meeting the fuel distribution needs of the Country in a timely manner and to ensuring the reliable and continuous supply of liquid fuels, aviation fuel, lubricants and cooking gas (LPG) to the local market.
