

Bearing Grease

HT-2

ULTRA
LUBRICANTS

WORLD CLASS LUBRICANTS
FOR TROPICAL CONDITIONS

GENERAL

Ultra Bearing Grease HT-2 is inorganic clay-based grease for plain and roller bearings operating at temperatures higher than those at which conventional soap-based greases can be used satisfactorily.

TYPICAL APPLICATION

Ultra Bearing grease HT-2 is based on a high viscosity mineral based oil and is especially suitable for low speed and heavily loaded plain and roller bearings, operating at temperatures between 10 °C and 200°C. It can be readily pumped down to 0°C.

TYPICAL PROPERTIES

	TEST METHOD	
Base		Bentonite Clay
NLGI Grade		2
Worked Penetration (1/10 mm)	ASTM D217	265 -295
Dropping Point, °C	ASTM D566	Above 250

HEALTH AND SAFETY

Ultra Bearing Grease HT-2 is unlikely to pose any health or safety hazards when used in the recommended applications provided that good standards of personal and industrial hygiene are observed.
